

## **ioki announces first international pilot: The Postbus shuttle in Lustenau/Vorarlberg**

*(Berlin, November 27, 2018)* ioki goes Austria: Today we start the test pilot of the Postbus Shuttle together with ÖBB Postbus in Lustenau/Vorarlberg in Austria. From Monday to Friday, the service will be available from 8am to 8pm and will enable flexible mobility without a fixed timetable.

For the first time ever, ioki starts an international pilot – in Austria: In cooperation with ÖBB-Postbus we are pursuing our goal to make mobility accessible for everyone and to enable individual rides, even in the countryside. "Especially in rural areas, people without an own car should be able to use mobility flexible and individually. We are looking forward to the cooperation and the entry into on-demand traffic in Austria," says Michael Barillère-Scholz.
